Projects

Crypto Hunter — ReactJS, Material UI, Firebase — [🔗](#) (view project)

- Crypto Hunter is a ReactJS based Web app.
- Integrated the Coin Gecko API to fetch live cryptocurrency prices, market capitalization, volume, and 24-hour price changes.
- Developed search functionality with real-time filtering to quickly find specific cryptocurrencies.
- The User can authenticate himself with mail or directly sign in with Google to get the latest updates about Crypto Market.
- Crypto comes with a watch-list feature where the user can also add his favorite cryptocurrency to his watch-list.

Car Rental App — ReactJS, Material UI, Firebase — [🔗](#) (view project)

- Created a user-friendly interface with filtering and sorting options to search for available cars based on location, type, price, and availability.
- Implemented secure user registration and login with Firebase Authentication, allowing users to manage their accounts and bookings.
- Optimized for mobile and desktop devices to provide a seamless experience across platforms.
- Ensured the application is mobile-friendly and adheres to web accessibility standards, making it user-friendly across all devices and inclusive for users with disabilities.

Skills

HTML, CSS, JavaScript, ReactJs
Firebase, Git, GitHub, RESTful APIs, Redux, Material UI, Jira

Achievements

- Solved over 100 Problems across various coding platforms.

Education

Madras Institute of Technology

Master of Technology

CGPA: 8.33

Sep 2019 – July 2021

Hindustan Institute of Technology and Science

Bachelor of Technology

CGPA: 8.13

July 2014 – June 2018

Certifications

- React - UDEMY Certified
- JavaScript - UDEMY Certified
