Experience

Telus International   May 2022 – present
Application Developer

<u>Roles and Responsibilitys</u>

– Developing and implementing highly responsive user interface components using react
– Responsibility for building UI using React and HTML and implementing it within the application.
– Responsible for the development of a new highly responsive, web-based user interface.
– Implemented best code practises strategies including using container/view design pattern to make the code as robust as possible along with other optimisations in the code
– Excellent interpersonal skills; willing to help, listen and learn
– Implement best practices and code standards

Projects

Crypto Hunter:
– Crypto Hunter is a ReactJS based Web app.
– Integrated the Coin Gecko API to fetch live cryptocurrency prices, market capitalization, volume, and 24-hour price changes.
– Developed search functionality with real-time filtering to quickly find specific cryptocurrencies.
– The User can authenticate himself with mail or directly sign in with Google to get the latest updates about Crypto Market.
– Crypto comes with a watch-list feature where the user can also add his favorite cryptocurrency to his watch-list.
– Technologies Used: ReactJs, Material Ui.

Car Rental App
– Created a user-friendly interface with filtering and sorting options to search for available cars based on location, type, price, and availability.
– Implemented secure user registration and login with Firebase Authentication, allowing users to manage their accounts and bookings.
– Optimized for mobile and desktop devices to provide a seamless experience across platforms.
– Ensured the application is mobile-friendly and adheres to web accessibility standards, making it user-friendly across all devices and inclusive for users with disabilities.
– Technologies Used: ReactJs, Material Ui.

Skills

Languages HTML, CSS, JavaScript, ReactJs Firebase, Git, Github, Redux, Material UI, Jira
OS Windows 10, Windows 7
IDEs Visual Studio

Achivements

– Solved over 100 Problems across various coding platforms.

Education

Madras Institute of Technology
Master of Technology in Aerospace   Sep 2019 – July 2021
CGPA: 8.33

Hindustan Institute of Technology and Science
Bachelor of Technology in Aeronautical   July 2014 – June 2018
CGPA: 8.33

Certifications
– React - UDEMY Certified
– JavaScript - UDEMY Certified
